What's on your mind?

I am able to regrow body parts after they are cut off. I can run up to 30 mph! I live from 5-20 years old. If something is bothering me I might shoot poison at it.

Share

I grow from 5-12 inches in my lifetime. That's almost as long as a table knife! I have yellow spots and lines all over my body. I have a long tail, glossy black skin, and a red throat.

Newt

Spade Foot Toad

I like to eat small insects, earthworms, small frogs, spiders, and slugs. When I eat my prey, I spray them with a layer of poison before I eat them.

Tiger Salamander

I live in the forest in the ground. I make burrows and hide myself under the dirt until the dirt gets dry. Then I go for a swim to moisten myself up after living in the dry dirt.
