Dear Mrs. Dingman,

As you may remember my daughter, Layla, was absent due to the fact that she was saving the world from mutant alien lava sharks that had fallen from the sky. If you can remember, the news said that mutant alien lava sharks were falling from the sky and eating not people, but the world's donut supply! As you may know as a teacher, you may understand, donuts are very important to our world. Donuts are what the world was even built on! So, with the sharks eating all our donuts, how would we even be able to survive?

You may have heard that the military was doing all that they could do to stop the sharks from eating the world's donut supply, but they were failing. Layla said that if the military can't stop the evil sharks, she will! With her amazing karate moves and awesomeness, she sent the alien lava sharks back to space with the help of NASA. She became a hero of the world. I hope you can understand.
