

Francis Drake

Born 1540

Died 1596

Worked for Queen Elizabeth

From England

What's on your mind?

Did you know I crossed the equator in July and sailed into Plymouth Harbor in September of 1580? I returned with one ship and a half starved crew of 58 men who had not set foot on a populated shore for 6 months. The ship carried the richest cargo ever to reach an England port. Did you know that there were spices, precious metals, jewels, silks, and irreplaceable maps?
